

Dear Hiring Manager,

I am excited to apply for the Java Developer position.

As a Software Engineer, I had a good experience in developing Rest APIs using Java and spring boot. Experience in end-to-end delivery of project, requirements gathering. Excellent time management skills with ability to perform under pressure & meet deadlines. I got an opportunity to work on “Unified Fertility Operations Management Solution” Project where, I worked as a backend developer, which involved building Java APIs, deploying those APIs, and constructing corresponding AWS Lambda gateways on various environments using Terraform. I also created and modified database tables using Liquibase files. I am confident that my technical skills, strong work ethic, and passion for software development make me an ideal fit for this position. Thank you for considering my application. I look forward to the opportunity to discuss how I can contribute to the project.

Sincerely,

Ayushi Namdeo
